PROBLEM STATEMENT

Problem Title : BHARAT SHAKTI

What does this Problem Aim to Solve?

- Traditional education follows a "one-size-fits-all" approach where every student receives the same content regardless of their age, learning pace, or preferred language. Students often struggle with scattered notes, lengthy lectures, poor revision methods, and lack of personalized guidance.

Why did your team choose this?

- Our team believes education should adapt to the learner, not the other way around. Vidorra leverages AI to make learning interactive, personalized, and engaging for every age group.

REAL-WORLD PROBLEM ALIGNMENT

Who faces this issue?

- School students
- College students
- Competitive exam aspirants
- Working professionals
- Teachers

What's the current gap in the system?

- No personalized study path
- No native-language explanation
- Poor revision techniques
- Lack of motivation
- No intelligent progress tracking

How does your proposed solution fill that gap practically?

- Vidorra combines AI, gamification, and adaptive learning to create an engaging study experience.

If possible, mention if it connects to any existing schemes.

- Digital India
- National Education Policy (NEP) 2020
- Skill India

PROPOSED SOLUTION

What are you Building?

- Vidorra is an AI-powered learning platform that converts lectures, PDFs, and notes into structured learning content. It generates AI summaries, personalized roadmaps, MCQ practice, progress tracking, and explanations in multiple languages while adapting the interface based on the learner's age.

What are the 3-4 Key Features?

- AI Notes & Summaries
- Native Language AI Tutor
- Personalized Roadmaps
- AI MCQ Practice
- Progress Analytics

What makes it different or innovative?

- Learning experience changes according to the user's age and learning behaviour.

ARCHITECTURE DIAGRAM

Show the Technical Flow using a simple block diagram.

Mention Frontend/Backend/Tools/API connections.

Include Cloud/Database/ML Model

GAMIFICATION & ADAPTIVE LEARNING

Gamification

- MCQ-based Flashcards
- Difficulty Levels
- Reward Points
- Badges
- Daily Streak
- Weekly Challenges

Leaderboards

- Age Group Ranking
- Global Ranking
- Institution Ranking

Adaptive Learning

➤ Children (5–10)

- Animations
- Colorful UI
- Fun quizzes

➤ Teens (11–18)

- Roadmaps
- Detailed Notes
- Exam Preparation

➤ Adults (18+)

- Career-focused learning
- Skill development
- Productivity dashboard

VIDORRA

Learn Smarter. Remember Longer.
